

$AV = \text{Adjacent - network}$

$AC = \text{Medium}$

$AV = \text{None}$

start with small words like xwv,
vw and jan at this point
we guess what the values are
i'll guess j looks like a vowel first
so $j \rightarrow a$ so shift of back
our words become

man are ONE

the whole message becomes

the rights of every

man are diminished

when the rights of

One man are threatened

I got lucky

$$n = p \times q \quad Z = (p-1)(q-1)$$

$$d \text{ rel prime } Z \quad e \cdot d \pmod{Z} = 1$$

$$c = m^e \pmod{n} \quad \text{exid} = cZ + 1$$

$$m = c^d \pmod{n}$$

$$2a. \quad Z = 60 \quad d = 7 \text{ or } 9$$

$$b. \quad Z = 360 \quad d = 7 \quad e \times 7 = c360 + 1$$

$$\text{when } c = 2, 2$$

$$n = 55$$

$$e = 103$$

$$c \quad Z = 40 \quad d = 27 \quad e \times 27 \pmod{40} = 1$$

$$c_1 = 1^3 \pmod{55} = 1 \quad 3 \times 27 = 81$$

$$c_2 = 2^3 \pmod{55} = 8 \quad e = 3$$

$$c_3 = 3^3 \pmod{55} = 27$$

$$\{abc\} = 1, 8, 27$$
